

Security Assessment Report

Scan Information

Target: 192.168.9.138

Scan Date: Fri Oct 2 05:30:39 PM EDT 2026

Open Ports

Port: 21/tcp Service: ftp Version: vsftpd 2.3.4
Port: 22/tcp Service: ssh Version: OpenSSH 4.7p1 Debian
Port: 23/tcp Service: telnet Version: Linux telnetd
Port: 25/tcp Service: smtp Version: Postfix smtpd
Port: 53/tcp Service: domain Version: ISC BIND 9.4.2
Port: 80/tcp Service: http Version: Apache httpd 2.2.8
Port: 139/tcp Service: netbios-ssn Version: Samba smbd 3.X
Port: 445/tcp Service: netbios-ssn Version: Samba smbd 3.X
Port: 2121/tcp Service: ftp Version: ProFTPD 1.3.1
Port: 8180/tcp Service: http Version: Apache Tomcat/Coyote JSP

Detailed Findings

FTP Anonymous Login (port 21)

FTP anonymous access appears to be allowed.

Risk: Anonymous FTP access may expose files to unauthenticated users.

Recommendation: Disable anonymous FTP access or restrict its permissions.

FTP Anonymous File Listing (port 21)

Anonymous FTP access was confirmed, but no directory contents were returned.

The FTP service accepted the anonymous request, but the directory listing was empty or unavailable.

SSH Banner

SSH-2.0-OpenSSH_4.7p1 Debian-8ubuntu1

SSH service and banner were successfully identified.

Risk: Exposed SSH banners can reveal the exact OS and software version to potential attackers.

Recommendation: Consider hiding or modifying the SSH banner configuration to minimize information disclosure.

Telnet Banner

#

Telnet service detected on port 23.

Risk: Telnet communication is not strongly encrypted.

Recommendation: Replace Telnet with SSH where possible.

SMTP User Enumeration

SMTP User Enumeration Tool: smtp-user-enum v1.2

Testing whether the SMTP service discloses valid usernames.

Username wordlist: wordlists/top-usernames-shortlist.txt

Starting SMTP username enumeration...

SMTP Enumeration Result

Starting smtp-user-enum v1.2 (<http://pentestmonkey.net/tools/smtp-user-enum>)

Scan Information

Mode VRFY

Target domain

Scan started at Fri Oct 2 17:27:46 2026

192.168.9.138: root exists

192.168.9.138: mysql exists

192.168.9.138: user exists

192.168.9.138: ftp exists

192.168.9.138: klog exists

192.168.9.138: elliot exists

192.168.9.138: www-data exists

192.168.9.138: service exists

192.168.9.138: syslog exists

192.168.9.138: msfadmin exists

Scan completed at Fri Oct 2 17:27:47 2026

10 results.

26 queries in 1 seconds (26.0 queries / sec)

Valid SMTP users were identified:

elliott

ftp

klog

msfadmin

mysql

root

service

syslog

user

www-data

Total users found: 10

root user was identified.

Risk: SMTP username enumeration may disclose valid system accounts.

Recommendation: Disable or restrict SMTP VRFY/EXPN functionality where possible.

Successful Credentials

elliott: *****

msfadmin: *****

service: *****

user: ****

Risk: Valid credentials were identified through credential auditing.

Recommendation: Change weak credentials and enforce strong password policies.

DNS Information

;; ->>HEADER<<- opcode: QUERY, status: NOERROR, id: 50798

;; flags: qr rd ra; QUERY: 1, ANSWER: 13, AUTHORITY: 0, ADDITIONAL: 27

DNS service responded to SOA queries.

Note: DNS zone transfer was not tested because a specific DNS zone name was not identified automatically.

HTTP Headers (port 80)

HTTP/1.1 200 OK

Date: Wed, 30 Sep 2026 07:14:31 GMT

Server: Apache/2.2.8 (Ubuntu) DAV/2

X-Powered-By: PHP/5.2.4-2ubuntu5.10

Content-Type: text/html

HTTP server information was disclosed in response headers.

Risk: Server information can help reconnaissance.

Recommendation: Minimize unnecessary server/version information.

robots.txt (port 80)

robots.txt -> HTTP 404

Common Web Paths (port 80)

[-] /admin -> 404 Not Found

[-] /login -> 404 Not Found

[-] /uploads -> 404 Not Found

[-] /backup -> 404 Not Found

[+] /test -> 301 Redirect

[!] /server-status -> 403 Forbidden

[+] /phpinfo.php -> 200 OK

[!] PHP information page detected.

Risk: PHP information pages may disclose sensitive server and application configuration.

Recommendation: Remove phpinfo.php from production systems or

restrict access.

[**-**] /robots.txt -> 404 Not Found

Directory Listing Check (port 80)

Directory listing was not detected.

SMB Anonymous Share Enumeration

Anonymous login successful

Sharename	Type	Comment
-----	----	-----
print\$	Disk	Printer Drivers
tmp	Disk	oh noes!
opt	Disk	
IPC\$	IPC	IPC Service (metasploitable server (Samba 3.0.20-Debian))
ADMIN\$	IPC	IPC Service (metasploitable server (Samba 3.0.20-

Debian))

Reconnecting with SMB1 for workgroup listing.

Anonymous login successful

Server	Comment
-----	-----
Workgroup	Master
-----	-----
WORKGROUP	METASPLOITABLE

Anonymous SMB access is allowed.

Risk: Anonymous access may expose shared resources.

Recommendation: Disable anonymous SMB access and restrict share permissions.

SMB Accessible Share Enumeration

Testing discovered disk shares for anonymous access...

Discovered SMB disk shares:

opt

tmp

Share: opt

Anonymous login successful

tree connect failed: NT_STATUS_ACCESS_DENIED

Anonymous access to share 'opt' was not permitted.

Share: tmp

Anonymous login successful

.X0-lock HR 11 Tue Sep 29 14:31:36 2026

7282168 blocks of size 1024. 5353000 blocks available

Anonymous access to share 'tmp' was confirmed.

Accessible resources were listed for share 'tmp'.

Risk: Anonymous SMB shares may expose files or directories to unauthenticated users.

Recommendation: Disable guest access and restrict share permissions to authorized users.

FTP Anonymous Login (port 2121)

curl: (67) Access denied: 530

Anonymous FTP access was not confirmed.

HTTP Headers (port 8180)

HTTP/1.1 200 OK

Server: Apache-Coyote/1.1

Content-Type: text/html; charset=ISO-8859-1

Transfer-Encoding: chunked

Date: Wed, 30 Sep 2026 07:14:32 GMT

HTTP server information was disclosed in response headers.

Risk: Server information can help reconnaissance.

Recommendation: Minimize unnecessary server/version information.

robots.txt (port 8180)

robots.txt -> HTTP 404

Common Web Paths (port 8180)

[+] /admin -> 302 Redirect

[-] /login -> 404 Not Found

[-] /uploads -> 404 Not Found

[-] /backup -> 404 Not Found

[-] /test -> 404 Not Found

[-] /server-status -> 404 Not Found

[-] /phpinfo.php -> 404 Not Found

[-] /robots.txt -> 404 Not Found

Directory Listing Check (port 8180)

Directory listing was not detected.
